THE 15 P's

STEP BY STEP PROMPTS TO WRITING COMPELLING COPY

The 15 Ps is the proprietary copywriting process developed by Brand Builders Group that is specifically intended to support personal brands. We exist to help mission-driven messengers build and monetize their personal brand. We have been frustrated and discouraged to see how many brands fail because they either get stuck writing copy, they write poor copy, or they pay outrageous amounts of money for (often) ineffective copy.

This tool is meant to make things easier for you and it can be modified and adapted to provide infrastructure for your website pages, funnel pages, presentation outlines, marketing videos and so much more. We refer to "Soft Sales Pages" as pages that do not make an attempt to actually collect a credit card. For those types of pages they usually are supported by a free call-to-action and we recommend only Ps 1-8, 14 and 15. If you are writing a "Full Sales Page" then that means you would be attempting to collect a credit card and you would utilize the full set of The 15 Ps.

If you would like help creating other elements of your brand strategy or executing the buildout of any part of the back end of your brand, please request a free brand strategy call from our team at brandbuildersgroup.com or from our referral partner who first introduced you to us. Thank you."

AVATAR PROMPT

What is all the pain that someone will have to go through to learn this all on their own?

11 Perspective

I know it may feel like I'm asking you to spend a lot of money BUT it's really pretty reasonable when you compare it to the other ways you'd have to learn this same information:

AVATAR PROMPT

What would the cost be of learning this from other sources?

How much have you spent in money, time, and the money value of time to learn what you will be teaching or providing in your offer?

What would be the potential negative impacts on a person or business if they never learned this at all?

Who or what other recognizable examples can you point to (even if they're not customers) as examples of people who have had to go through the hard road of figuring this out on their own and how painful do you think it was for them?

12 (LIMITER) Payment

And just to help you make this a total no-brainer, I'd even be willing to throw in this as an amazing free bonus and incentive to take action quickly:

AVATAR PROMPT

What additional incentive can you provide here that is super compelling?

What other complementary tools would a person need (that you can offer as a bonus) if there were to try and implement everything you're going to teach them?

What other assets can you create or give to someone who purchases that increases the likelihood or speed that they will execute?

How can you make this an absolute no-brainer that someone would be insane to not buy or take advantage of?
